

Re: Potential LEED v4 credits for projects using Design-Rib by Amarco Products

To whom it may concern:

Many finishing products have the potential to contribute points to LEED v4, however the credits can only be gained when calculating the combined performance of all the products used on a particular LEED project; therefore no single product can guarantee you will obtain LEED v4 credits.

The LEED v4 rating system promotes improved practices in the following credit categories:

- o Location & Transportation
- o Sustainable Sites
- o Water Efficiency
- o Energy & Atmosphere
- o Materials & Resources
- o Indoor Environmental

Amarco Products' Design-Rib may contribute to the following LEED credits (points), the following is based on LEED NCv4:

- v4 MRc2: Material and Resources – Building product disclosure and optimization, environmental product declarations:
 - o Option 1. Environmental product declaration (EPD) is available.

- v4 MRc3: Material and Resources – Building product disclosure and optimization, sourcing of raw materials:
 - o Option 2. Sourcing of raw materials.

Recycled content. Recycled content is 15% postconsumer.

- v4 EQc1: Indoor Environmental Quality – Enhanced indoor air quality strategies:
 - o Option 1. Enhanced IAQ strategies. Installed with at least 10 feet (3 meters) in length in the primary direction and maintained on a weekly basis.

- v4 EQc2: Indoor Environmental Quality – Low emitting materials:
 - o Option 1 (Flooring). General emissions evaluation. Verified third party / Green Label Plus® certificate is available.
 - o Option 2. Budget Calculation Method.

If you require any further information, please do not hesitate to contact us.

Sincerely,

Amarco Products
